Re: CRMC File # *2021-03-003*

Applicant: *Town of Barrington*

Town: *Barrington*

Response date: *3/16/21*

Dear Ms. Cervenka,

The Rhode Island Historical Preservation and Heritage Commission (RIHPHC) staff has reviewed the above-referenced application. It is our determination that the proposed project will have **no effect** on any significant cultural resources (those listed on or eligible for listing on the National Register of Historic Places, or those listed on the State Register of Historic Places).

These comments are provided in accordance with 650-RICR-20-001.2.3 Areas of Historic and Archaeological Significance of the Coastal Resources Management Council. If you have any questions, please contact Charlotte Taylor, Senior Archaeologist, at this office.

Very truly yours,

J. Paul Loether
Executive Director, RIHPHC
State Historic Preservation Officer

c/o Mr. Philip Hervey, Director of Planning, Building & Resiliency
283 Country Road
Barrington, RI, 02806

**Re: Water Quality Certification: Walker Farm Recreation and Resilience Improvements
513 County Road, Plat 16, Lot 20, Barrington, RI.
WQC/SW No. 21-108**

Dear Mr. Hervey:

The Rhode Island Department of Environmental Management Office of Water Resources (RIDEM OWR) has reviewed the above referenced project for compliance with the State Water Quality Regulations (250-RICR-150-05-1). The purpose of the project is to conduct recreation improvements, habitat restoration and climate resilience improvements at Walker Farm in Barrington, as further described in your application and detailed on site plans consisting of 9 sheets, prepared by Shawn M. Martin of Fuss & O'Neill, received by RIDEM OWR on July 1st. The State Water associated with this project is the Barrington River, class SA. File No.

It has been determined that the above-referenced application is compliant with the requirements of the RI Water Quality Regulations provided that the Applicant complies with the above-referenced application materials and the following conditions:

- 1) You must notify the RIDEM OWR contact person identified below of the anticipated date of construction and your contractor's contact information, prior to any site disturbance.
- 2) Prior to construction, proper erosion and sedimentation controls/procedures, as identified in the above-referenced plans are installed and maintained in functional condition for the duration of the construction project.
- 3) Prior to construction, you must erect or post a sign resistant to the weather and at least twelve (12) inches wide and eighteen (18) inches long, which identifies the initials "DEM" and the application number(s) assigned to this project. The sign must be posted in a conspicuous location near the site access and maintained until the project is complete.
- 4) All fill material shall be clean and free of matter that could cause pollution of the waters of the State.

- 5) No sewage, refuse, or waste of any kind shall be discharged into waters of the State from activities associated with the proposed project. Any release of materials from the site associated with the project during the construction period will require immediate notification to RIDEM OWR.
- 6) A copy of this WQC must be kept at the site at all times during site preparation, construction, and final stabilization. Copies of this WQC must be made available for review by any RIDEM or City/Town representative upon request.
- 7) Any alterations, additions, or modifications to the project design plans from that approved herein must first be reviewed and approved by RIDEM OWR.
- 8) You must notify the RIDEM OWR contact person identified below upon completion of the project.
- 9) This WQC shall expire on August 3, 2024. Project construction is to be completed by this date. You are required to submit a request for any modification(s) and/or extension(s).
- 10) This WQC does not relieve your obligation to obtain and adhere to any other applicable local, state and federal permits prior to commencing construction. Should any stipulation/condition identified within any other applicable permit be in conflict with the conditions set forth in this WQC, the applicant shall notify RIDEM OWR immediately.

You are required to adhere to all above Terms and Conditions and carry out this project in compliance with the State Water Quality Regulations at all times. Issuance of this certification does not bar the Rhode Island Department of Environmental Management, nor any of its various Divisions, from initiating any investigation and/or enforcement actions that it may deem necessary for violations of this certification or of any and all applicable statutes, regulations and/or permits.

This is the State's Water Quality Certification, which shall have the full force and effect of a permit issued by the Director. Violation of the Terms and Conditions of this Certification may result in violation of the State's Water Quality Regulations and appropriate enforcement action.

If you have any questions regarding the contents of this WQC, you may contact Sarah Frazar at sarah.frazar@dem.ri.gov or (401) 222-4700, extension 77243.

Sincerely,

A handwritten signature in black ink, appearing to read "Neal Personaeus".

RE: Walker Farm Recreation and Resilience Improvements
Plat 16, Lot 20
513 County Road
Barrington, RI

Dear Ms. Frazer,

This letter is in response to requests for additional information received by email on June 23, 2021. Your requests are in italics below and our responses follow beneath each.

1. *Please add the MHW line to the site plan (CS-101).*

Mean High Water (MHW) is at elevation 1.94 and has been added to the attached plans, along with the MHHW and MLW. Tidal information is also listed on Sheet SU-1 of the Plans.

2. *Please further specify the location and extent of slope restoration on CS-101 in relation to MHW.*

The extents of slope restoration have been hatched on CS-101 for clarity. Slope restoration is proposed as needed where the shoreline will be disturbed to ensure that removal of existing rubble and vegetation do not result in steep and/or uneven slopes. As noted on the Slope Restoration detail, grades will be restored to approximately match existing elevations using native material at a maximum slope of four to one. Where slopes steeper than four to one currently exist along the shoreline, proposed grading is indicated on the Site Plan to make these areas more gradual.

3. *Please also add elevations to the Slope Restoration detail on CD-502 (with MHW included).*

The slope restoration detail is a typical detail only intended to indicate the maximum proposed slope and the material of the shoreline. Elevations have not been added to the detail as they vary across the length of the shoreline.

4. *Please add elevations and MHW to the Rip Rap Armoring Detail on CD-503.*

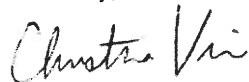

Elevations and MHW have been added to the Rip Rap Armoring detail on the attached plans. As indicated on the detail, the Rip Rap Armoring will be installed entirely within cut. Approximately 10 CY of stone and rip rap will be installed below MHW, however, it will be installed below the existing ground surface elevation, so it will not result in any fill.

5. *Please provide the volume of fill below MHW for each area of impact (slope restoration, paddlecraft launch, etc.).*

- Slope Restoration will not result in fill below MHW. Grades will be restored to match existing elevations where necessary following rubble removal. The only regrading proposed below the MHW elevation is associated with the paddlecraft launch.
- The Paddlecraft Launch will be constructed mostly within cut. A small volume (approximately 2 CY) of fill is proposed at the bottom of the launch in order to meet existing grade while providing a consistent elevation along the toe of slope. However, the paddlecraft launch will result in a net cut of approximately 9 CY below MHW.
- Rip Rap Armoring will not result in fill below MHW. See response to No. 4, above.

Please contact me at cvierra@fando.com or 401-861-3070 X4544, should you have any additional questions relating to the content of this application.

Sincerely,

Christina Viera, PE
Civil Engineer
